

# GitHub

CMC has created a set of community-driven GitHub repositories to help share ideas, solutions and knowledge regarding CampusNexus! We would love for you to contribute to this community as well, so please feel free to fork a project and commit your proposed changes. Submitting a change will write to a new branch so you can send a pull request to Campus Management to incorporate changes back into the master branch.

To access the Campus Management GitHub repositories, you can navigate to: <https://github.com/campusmanagement>

Check out the three repositories below and refer to their respective landing pages for instructions on how to get started.

The screenshot shows the GitHub profile page for Campus Management Corp. The profile includes a blue square logo with the text "CAMPUS MANAGEMENT", the name "Campus Management Corp.", the username "campusmanagement", and an "Unfollow" button. Below the profile information, it lists "Campus Managemement" with the location "Boca Raton, Florida" and the website "http://www.campusmanageme...".

The "Popular repositories" section displays four repositories:

- fb-sequence-templates**: Forms Builder sequence and workflow templates. 1 star, 2 forks.
- workflow-samples**: A set of CampusNexus workflow samples to help get started extending logic using workflow. 1 C# star, 1 fork.
- integration-samples**: A set of CampusNexus integration samples to help get started integration with CampusNexus APIs. 1 C# star, 1 fork.
- angular-gettext**: Forked from rubenv/angular-gettext. Gettext support for Angular.js. JavaScript.

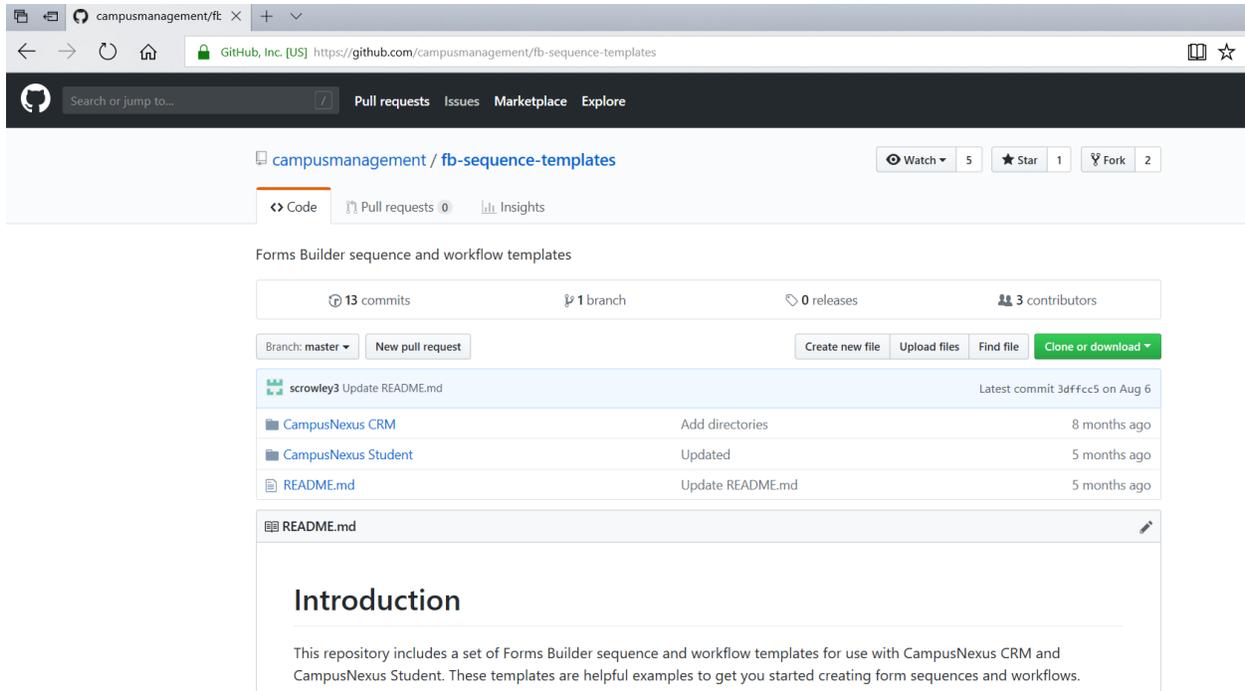

The "11 contributions in the last year" section shows a contribution grid for the last year (Dec to Dec). The grid shows contributions on the following dates: April 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st.

**Note:** It is important to understand the templates in the GitHub repository were created in one environment and can be shared and re-used in another environment. They are for the sole purpose of providing templates to customers as a starting point for building Student Self-Service processes using Forms Builder/Workflow in their own environments. Almost always, changes and/or updates are needed to these templates to ensure values/ID's are aligned with the customer's environment (database).

# Forms Builder Sequence Templates

The [Forms Builder Sequence Templates](https://github.com/campusmanagement/fb-sequence-templates) repository includes a set of Forms Builder sequence and workflow templates for use with CampusNexus CRM and CampusNexus Student. These templates are helpful examples to get you started creating form sequences and workflows.

<https://github.com/campusmanagement/fb-sequence-templates>

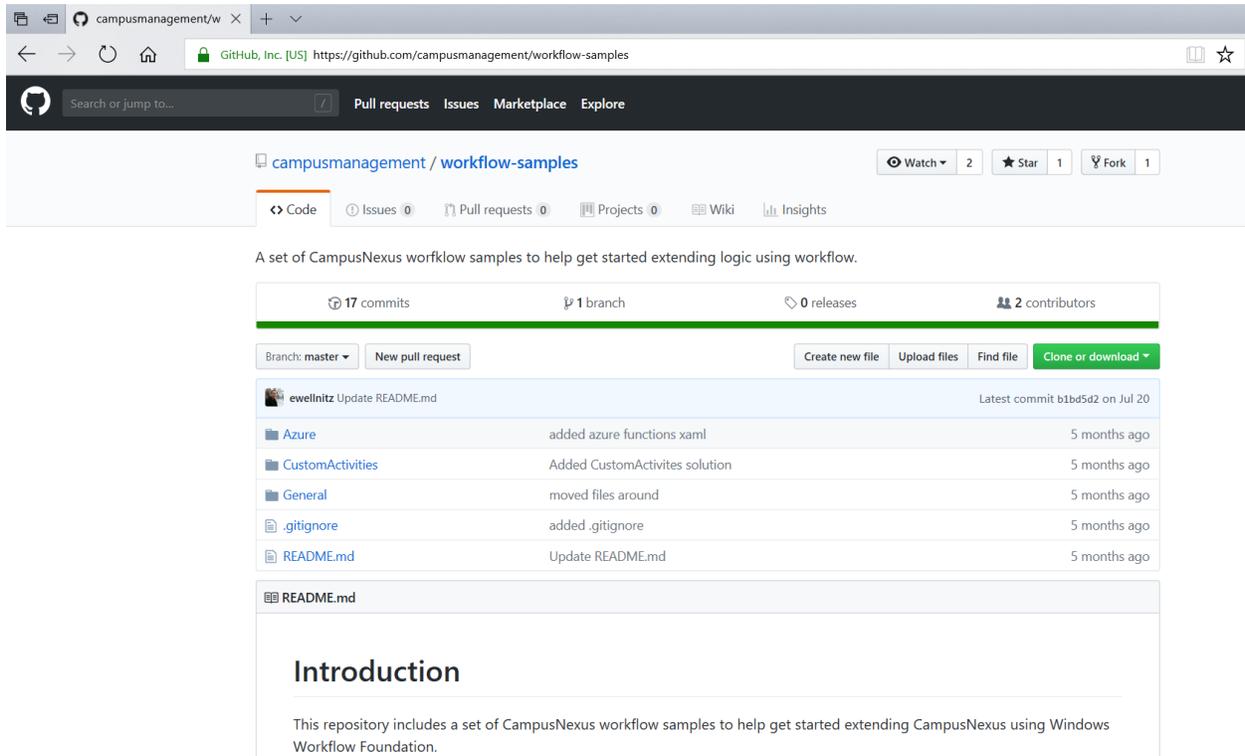

The screenshot shows the GitHub repository page for 'campusmanagement/fb-sequence-templates'. The repository has 13 commits, 1 branch, 0 releases, and 3 contributors. The latest commit is by 'scrowley3' on August 6, updating the README.md. The repository contains subdirectories for 'CampusNexus CRM' and 'CampusNexus Student', and a 'README.md' file. The README.md file is open, showing an 'Introduction' section that states: 'This repository includes a set of Forms Builder sequence and workflow templates for use with CampusNexus CRM and CampusNexus Student. These templates are helpful examples to get you started creating form sequences and workflows.'

Commit	Message	Time
scrowley3	Update README.md	Latest commit 3dffc5 on Aug 6
	CampusNexus CRM	Add directories 8 months ago
	CampusNexus Student	Updated 5 months ago
	README.md	Update README.md 5 months ago

# Workflow Samples

The [Workflow Samples](https://github.com/campusmanagement/workflow-samples) repository contains a set of sample workflows and workflow activities that you can easily import into your environment using CampusNexus Workflow.

<https://github.com/campusmanagement/workflow-samples>

The screenshot shows the GitHub repository page for 'campusmanagement/workflow-samples'. The page includes a navigation bar with 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. The repository name is 'campusmanagement / workflow-samples', with 2 watches, 1 star, and 1 fork. The main content area shows a set of CampusNexus workflow samples to help get started extending logic using workflow. It lists 17 commits, 1 branch, 0 releases, and 2 contributors. The latest commit is by ewellnitz, updating README.md on Jul 20. The commit history includes:

Commit	Description	Time
Azure	added azure functions xaml	5 months ago
CustomActivities	Added CustomActivites solution	5 months ago
General	moved files around	5 months ago
.gitignore	added .gitignore	5 months ago
README.md	Update README.md	5 months ago

The README.md file is visible, with the following content:

## Introduction

This repository includes a set of CampusNexus workflow samples to help get started extending CampusNexus using Windows Workflow Foundation.

# Integration Samples

The [Integration Samples](https://github.com/campusmanagement/integration-samples) repository contains examples of consuming CampusNexus APIs using various technologies such as .NET, JavaScript and Azure Logic Apps.

<https://github.com/campusmanagement/integration-samples>

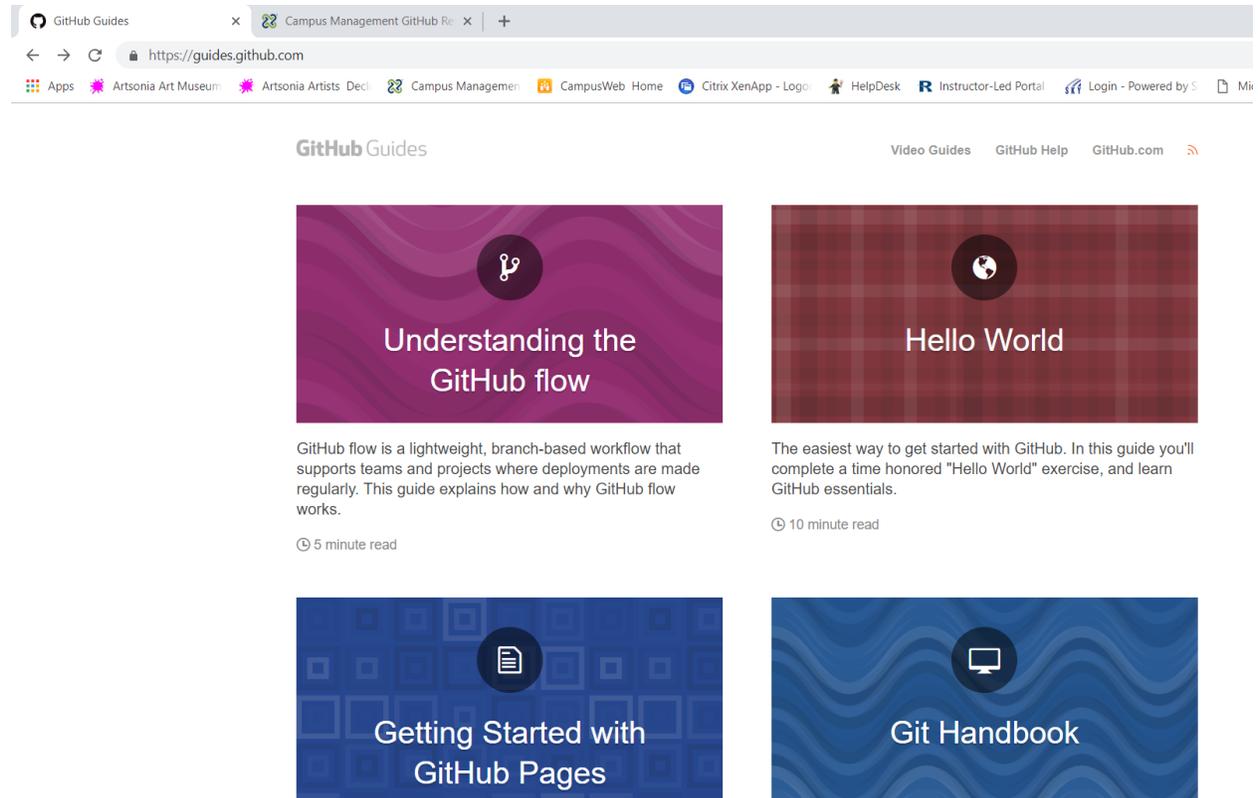

The screenshot shows the GitHub repository page for 'campusmanagement/integration-samples'. The page includes a navigation bar with 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. Below the navigation bar, there are statistics for the repository: 36 commits, 1 branch, 0 releases, and 2 contributors. A table lists the repository's files and folders, including 'DotNetEventHandlers', 'DotNetODataClient', 'DotNetWebApiClient', 'PostmanCollections', 'PythonODataClient', 'PythonWebApiClient', 'RubyODataClient', 'RubyWebApiClient', '.gitattributes', '.gitignore', and 'README.md'. The table also shows the commit message and the time since the last commit for each file.

File/Folder	Commit Message	Time Since Last Commit
DotNetEventHandlers	Update README.md	5 months ago
DotNetODataClient	Update Program.cs	4 months ago
DotNetWebApiClient	Update Program.cs	4 months ago
PostmanCollections	Update README.md	4 months ago
PythonODataClient	Add python samples	4 months ago
PythonWebApiClient	Add python samples	4 months ago
RubyODataClient	Add ruby examples, restructure project readme file to be grouped func...	3 months ago
RubyWebApiClient	Add ruby examples, restructure project readme file to be grouped func...	3 months ago
.gitattributes	Added DotNetODataClient	5 months ago
.gitignore	added README.md	5 months ago
README.md	Add ruby examples, restructure project readme file to be grouped func...	3 months ago

# GitHub Resources

The below link will provide guides for getting started with GitHub, links to GitHub Help, Videos and More.

<https://guides.github.com/>

The screenshot shows the GitHub Guides website interface. At the top, there are navigation links for "Video Guides", "GitHub Help", and "GitHub.com". Below the navigation, there are four guide cards arranged in a 2x2 grid:

- Understanding the GitHub flow**: A purple card with a GitHub logo icon. Description: "GitHub flow is a lightweight, branch-based workflow that supports teams and projects where deployments are made regularly. This guide explains how and why GitHub flow works." Read time: 5 minute read.
- Hello World**: A red card with a globe icon. Description: "The easiest way to get started with GitHub. In this guide you'll complete a time honored 'Hello World' exercise, and learn GitHub essentials." Read time: 10 minute read.
- Getting Started with GitHub Pages**: A dark blue card with a document icon.
- Git Handbook**: A blue card with a monitor icon.
